

Subodh Newsletter

September | 2017

Editorial

With the arrival of this rainy and blooming season, we are pleased to welcome you all once again to this new session 2017-18 and the launch of the new volume of our college newsletter.

Like the freshness in the air of the premises and in the minds of new students and faculty members, the issue brings to you many fresh and positive developments that the college has experienced recently.

With the renovation of building, completion of new indoor sports arena, lifts and smart classrooms along with up-gradation of different labs, the college has prepared itself even better to offer you an enriching journey towards personal and professional excellence.

Every new step towards knowledge is motivated by appropriate guidance and resources and both of these make learning complete. At Subodh we have tried to facilitate both academic and infrastructural support to give learning the direction that every student strives for.

With a thumbs up to this positive start, we welcome all our new students and faculty members and hope to achieve new heights for the institution that not only believes in quality but also practices it to the core.

है अपना स्वर्णिम इतिहास, सदा श्रेष्ठता और उल्लास
आधुनिक गौरव से प्रमाणित, नीतिगत मूल्यों में समाहित
अनुपम से उत्कंठा का विलय, हमारा सुबोध स्नातकोत्तर महाविद्यालय

From the Principal's Desk

'You do not have to be great to start but you have to start to be great'

The beginnings of the sessions are always special, bringing with them a freshness in spirit and mind. Their timing aptly coincides with the refreshing monsoon showers after a spell of scorching heat, triggering a zeal to get back to work with a new vigor. After the successful completion of the admission process, regular classes have begun and the campus seems full of life. Like every start, this session too

began with so many opportunities to harness in the coming year inspiring us all to chalk out the year to the best of our abilities. Every new day offers an opportunity to do something new, something different, and something better, simultaneously giving us the message that small beginnings lead to great endings and this is what we follow as our institutional philosophy. I would like to re-emphasize that much of the success as an educator has to do with the attitude towards teaching. While educating our students, intellectually, it is vital that we do not neglect to educate them emotionally too, so that every day becomes a new learning experience for them not only as a student but also as a human being.

I extend my best wishes to all the students and faculty for their endeavors in the coming year along with the message that even a journey of a thousand miles begins with a single step. Wishing you all joyous and festive Diwali !

Achiever's Bay

Awards and Honours

Teacher's Day Celebration

Speak your 'Self'

Dr. Suprithy Paliwal
Department of Psychology

Are you able to deal with difficult events that change your lives like, the death of a loved one, serious illness or any traumatic event? Many people react to these situations very emotionally. However, with time people are able to adapt to these stressful situations. Some of the ways to build resilience are:

- Have strong relationships with family and friends as they provide external support.
- Seek support from people who care for you
- Do not see problems as being life long. Highly stressful events happen to all. You have to change how you interpret and respond to these events. Dealing with less difficult situations help you to solve difficult situations.
- Set realistic and small goals to achieve bigger goals. Achieving smaller goals, helps you to accomplish difficult tasks.
- Be optimistic and expect that good things will happen in your life.
- Take change to be a part of life and do not be demotivated by the unchangeable circumstance but focus on the circumstance that can be changed.
- Be confident about yourself; this helps build resilience.
- Do not blow up the situation. Every one has some problem or the other in life. Face it as it comes. Avoid blowing the event out of proportion.

मेरी पहचान

Aaditya Naruka
BCA-III Sem

एक प्यारा सा एहसास,
एक अनकहा सा साथ, मेरे
पापा मेरी पहचान..!!

जब हुआ मैं तो माँ से
ज्यादा पापा खुश थे,
आँखों में नामी और
दिल में प्यार के एहसास थे
मेरे पापा मेरी पहचान थे..!!

बचपन कि छोटी यादों में,
पापा ने चलना सिखाया था
गिरते हुए मेरे विश्वास को,
पापा ने फिर से जगाया था
पापा ने फिर से जगाया था..!!

बचपन कि छोटी चोटों में
पापा ने मुझको हंसाया था,
रोते हुए बेटे के चेहरे में
मुस्कान का फूल खिलाया था
मुस्कान का फूल खिलाया था..!!

बचपन कि मेरी यादों में, कुछ
ख्वाबों ने दिल को चुराया था
मेरे प्यारे पापा ने, हर
ख्वाब को सच कर दिखाया था
हर ख्वाब का सच दिखाया था..!!

हर शाम एक खिलौने पे
मेरी मुस्कान खरीद के लाये थे,
प्यारे से मेरे पापा ही मेरे,
खिलौने को घर पे ले आये थे
वो घर तक चल के आये थे..!!

Creative Hues

Life begins at the end of your comfort zone

Anu Malhotra

Department of Chemistry

A comfort zone is a psychological state in which a person feels secure, comfortable or in control with very little anxiety and stress BUT the sooner you step away from your comfort zone, the sooner you realise it wasn't all that comfortable. Comfort zone is a settled method of working which requires little effort and yields barely acceptable results. The more time we spend outside the comfort zone, the more we achieve.

An excellent example of the infinite capability of human power to come out of the comfort zone is Karoly Takacs of the Hungarian Army. He was the top pistol shooter in the world who was expected to win the gold in the 1940 Olympics. While training, a hand grenade exploded in his hand and it was blown off, shattering all his dreams. The easiest option was to quit shooting but Takacs was made of stronger stuff. He pushed himself out of his comfort zone, learnt to shoot with his left hand and won the gold medal in the 1948 and 1952 Olympics.

West Indies spinner Sunil Narine was touted as the biggest surprise of IPL 10(2017) season-he had been suspended from bowling in international cricket for illegal action in 2015. He came back with a remodelled action in IPL 10. Even as his bowling was being worked out, Sunil fashioned himself into an opening batsman by coming out of his comfort zone and hitting the fastest 50 in IPL history (Yusuf Pathan also holds the record). Muthiah Muralitharan, another bowler who had to work a lot on his action, said-It is never easy for any bowler to succeed after making changes but Sunil and Muralitharan did so.

Scientifically, it has been proven that trying to do new things increases levels of dopamine in the brain which is part of the brain's reward centre. Novelty has been shown to improve memory too. Daniel H. Pink, the author of "Drive-The surprising thing about what motivates us" says-We all need a place of productive discomfort, if you are too comfortable you are not productive. PM Sh. Modiji, in his *Mann ki Baat* in April 2017, urged the youth of the country to step out of the comfort zone and try something exciting in the Summer Vacation. He urged the youth to explore new talents, skills and places. India ranks 66th on the Global Innovation Index list, while the US is first. Even successful Indian start-ups have based their business model on proven Western businesses-Flipkart on Amazon, Ola on Uber etc. We need to come out of our comfort zone and innovate more because that is how civilizations evolve. Get comfortable being uncomfortable. Ashton Kutcher, the Hollywood actor says", I am continuously trying to make choices against my own comfort zone. As long as you are uncomfortable, it means you are growing."
