National Science Day (NSD-18) Celebration

28th February, 2018

THEME

Science and Technology for Sustainable Future

National Science Day is observed to mark the novel discovery of Raman Effect by the great Indian Physicist Sir C.V. Raman on 28th February, 1928. Raman Effect is a phenomenon in spectroscopy discovered by the eminent physicist while working in the laboratory of the Indian Association for the Cultivation of Science, Kolkata. After two years of this discovery, Sir C. V. Raman brought the first Nobel Award for the country in 1930. Hence the National Science Day is a great day for Indian Science and Scientific community. Besides, National Science Day offers an opportunity to bring issues of science on to centre stage.
