## ABOUT THE WORKSHOP

Biodiversity or Biological diversity is a term that describes the variety of living beings on earth. In short, it is described as degree of variation of life. It represents the wealth of biological resources. In this era when urbanisation and industrialisation increased in profit of human beings it reverts the less biodiversity. These days it is required that all the diversities should be conserved.

For the survival of human beings three things are necessary as " Roti, Kapda aur Makaan". All these three things totally dependent on plant wealth. This plant wealth requires conservation of biodiversity. Although these days for our wellness, chemicals are used or we can say medicines used by human beings prepared by chemicals. We can see the side effects of these chemically prepared drugs. For our medical wealth we need biodiversity of both flora and fauna by which we can cure safely.

For this conservation of biodiversity we require proper identification, preservation of the flora and fauna.

The present workshop on Biodiversity: Its Issues and Solutions, is an effort to assemble education institutes, eminent scientists, research scholars, members of Botanical Survey of India ( BSI) and Governing Body of Biodiversity, to do something for identification of flora and fauna, their listing and proper conservation by different methods.

Assessment of biodiversity with special emphasis of Jaipur region, working of BSI, plant systematic and importance of ethnobotany will be discussed in this workshop. It also provides a critical and conceptual understanding of biodiversity science within which management, policies and decisions are made for conservation of biodiversity. It is an opportunity for our youth to know about their surrounding and better knowledge that how can they conserve health and wealth for mankind.

Students are going to participate in the workshop. This will definitely help to make clear the importance of biodiversity in human life with identification, systematic of plants and animals.
