

S.S.JAIN SUBODH P.G. (Autonomous) COLLEGE JAIPUR
(Affiliated to University of Rajasthan)

Syllabus

SCHEME OF EXAMINATION AND COURSES OF STUDY

FACULTY OF SCIENCE

DEPARTMENT OF ZOOLOGY

M.Sc. Zoology (I, II, III and IV Semester- 2016-18)

Contents:

- 1. OBJECTIVES**
- 2. ELIGIBILITY**
- 3. SCHEME OF EXAMINATION**
- 4. SEMESTER STRUCTURE**

Objectives:

The objective of the course M.Sc. Zoology is to impart knowledge of Zoology to graduates of Biology with an emphasis on the world of animals, their evolution to the present forms over time, their habitats and food habits, and their co-existence with each other. Thus, knowledge of zoology is essential to experience the wonders of nature in the fullest. The programme enhances students to take up emerging opportunities in Life Sciences, in fields like Aqua Culture, Fisheries, Biotechnology, Medical Informatics and Environmental Management. Students are provided with requisite skills to take up research, teaching, entrepreneurship and other employment opportunities in zoology.

Department offers specialization in several major disciplines of Zoology

- 1) Cell & Molecular Biology
- 2) Environmental Toxicology
- 3) Entomology
- 4) Cell & Molecular biology

The main Goals and objectives of the course are:

The Department tries to achieve the overall goals and objectives of the college and also focuses on the following special departmental objectives:

- Provide quality education in natural science
- Inculcate the spirit of resource conservation and love for nature
- Motivate students for self employment in applied branches of Zoology
- Equip the students for higher education
- Impart value based education and makes them members of civil society and provide opportunities for professional and personal development through curricular and co- curricular activities
- Conduct field studies - document biodiversity, water quality, soil profile etc. through student projects and faculty research, and Provide consultancy and organize extension activities

Employment Opportunities

- Teaching
- Research Scientist in Life Science domain
- Aquaculture, Museum curators, Environmental Analysts, Zoological Parks
- E-Publishing, E-Learning, Hospital and Clinical Labs, Bio-Informatics

Eligibility:

A candidate who has secured more than 55% or CGPA of 3.5 in the UGC Seven Point scale [36% or Pass marks for SC/ST/Non-creamy layer OBC/SBC] or equivalent in the Bachelor degree in Science shall be eligible for admission to First Semester of a Master of Zoology course. For candidates from outside state of Rajasthan 60% or CGPA of 4.0 in the UGC Seven Point Scale will be applicable irrespective of the category.

Scheme of Examination:

1. Each theory paper carries 100 marks. The internal assessment will be 30 marks and EoSE shall carry 70 marks. The EoSE will be of 3 hours duration. There will be a practical examination of 200 marks in all Semester.
2. There will be two parts in EoSE theory paper. Part A of theory paper shall contain 10 Short Answer Questions of 14 marks, based on knowledge, understanding and applications of the topics/texts covered in the syllabus. Candidate has to attempt seven questions out of 10 and each question will carry two marks for correct answer.
3. Parts "B" of EoSE theory paper will consist of four questions from each unit with internal choice of 14 mark each. The limit of answer will be five pages.
4. **Each** Laboratory EoSE will be of four hour durations and involve laboratory experiments/exercises/ Seminar presentation / Synopsis presentation/Project work or field study / Industrial Training/ consultancy training and viva-voce examination consisting of 200 Marks.
5. The aim of Project work or field study /Research laboratories/ Hospital training is to introduce students to research methodology in the subject and prepare them for pursuing research in theoretical or experimental or computational areas of the subject. The project work or Field Study is to be undertaken under guidance jointly by Head of the Department and a senior faculty or a Scientist or any other suitable person with proven research excellence in the concerned field of study. Project work or field study / Hospital Training/ can also be taken up in an outside institution of repute Department. The guide will make continuous internal assessment of the Project work or field study / Hospital Training. EoSE for Project work or field study / Hospital Training and seminar will be held at department of the college by a board of three examiners consisting of HOD, two senior faculty of the department or expert from interdisciplinary department of the institution.
6. Supplementary/ due paper/ special examinations will be resolute as per the institutions autonomous rules.
7. Grade/CGPA/percentage/division will be decided as per the autonomous guidelines of the institution.

Proposed course for M.Sc. Zoology

M. Sc. I Semester

Max. Marks (Theory): 400

Nomenclature			External/ Theories	Internal/ Theories	Total Mini. Marks	Total Max Marks
MZO 101	Paper I	Principles of Biosystematics &Taxonomy	70	30	40	100
MZO 102	Paper II	Structure & Function of Invertebrates	70	30	40	100
MZO 103	Paper III	Biochemistry	70	30	40	100
MZO 104	Paper IV	Essentials of Cytology	70	30	40	100
MZO 151 Practical			80	60	80	200
MZO 152 Lab Work & Seminar				60		

M. Sc. II Semester

Max. Marks (Theory): 400

Nomenclature			External / Theories	Internal / Theories	Total Mini. Marks	Total Max Marks
MZO 201	Paper I	General Physiology	70	30	40	100
MZO 202	Paper II	Environmental Biology & Ethology	70	30	40	100
MZO 203	Paper III	Molecular Biology, Biotechnology &Bioinformatics	70	30	40	100
MZO 204	Paper IV	Genetics and Molecular Evolution	70	30	40	100
MZO 251 Practical			80	60	80	200
MZO 252 Lab Work & Seminar				60		

M. Sc. III Semester

Max. Marks (Theory): 400

Nomenclature			External / Theories	Internal / Theories	Total Mini. Marks	Total Max Marks
MZO 301	Paper I	Biology of Chordates	70	30	40	100
MZO 302	Paper II	Genes & Differentiation	70	30	40	100
Core Elective I						
MZO303A	Paper III	Basics of Toxicology	70	30	40	100
MZO303B	Paper III	Fundamentals of Radiation	70	30	40	100
MZO303C	Paper III	Systematics and Ecology of Insects	70	30	40	100
MZO303D	Paper III	Molecular biology of the Gene	70	30	40	100
Core Elective II						
MZO304A	Paper IV	Environmental Pollution & legal frame work	70	30	40	100
MZO304B	Paper IV	Biological Effects of Ionizing Radiation	70	30	40	100
MZO304C	Paper IV	Insect Morphology, Physiology, Embryology and Development	70	30	40	100
MZO304D	Paper IV	Proteomics	70	30	40	100
MZO 351 Practical (External) Lab Work & Seminar			50	50	80	200
MZO 352 Core Elective Practical Synopsis Preparation /Presentation(Internal)			50	50		

Note: Minimum number of applicants must be 05 to run the special paper.

M. Sc. IV Semester**Max. Marks (Theory): 400**

Nomenclature			External/ Theories	Internal / Theories	Total Mini. Marks	Total Max Marks
MZO 401	Paper I	Applied Zoology & Biostatistics	70	30	40	100
MZO 402	Paper II	Tools & Techniques in Biology	70	30	40	100
Core Elective III						
MZO 403A	Paper III	Applied Aspects of Toxicology	70	30	40	100
MZO 403B	Paper III	Principles of Radiation Protection, Legislation & International Framework	70	30	40	100
MZO 403C	Paper III	Industrial, Medical & Veterinary Entomology	70	30	40	100
MZO 403D	Paper III	Cellular mechanics	70	30	40	100
Core Elective IV						
MZO 404A	Paper IV	Biomonitoring & Bioremediation	70	30	40	100
MZO 404B	Paper IV	Occupational Exposure and Radiation Safety	70	30	40	100
MZO 404C	Paper IV	Insect Toxicology and Pest Control	70	30	40	100
MZO 404D	Paper IV	Molecular Immunology	70	30	40	100
MZO 451 Practical (External) Lab Work & Seminar			40	60	80	200
MZO412 Core Elective Practical (External) Dissertation Presentation (Internal)			40	60		

Note: Minimum number of applicants must be 05 to run the special paper.

Core Electives

- 1) Radiation Biology 2) Environmental Toxicology 3) Entomology 4) Cell & Molecular Biology

Semester- I THEORY

Paper I

MZO-I01: [Principles of Biosystematics & Taxonomy]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Definition and basic concepts of biosystematics and taxonomy, History of Taxonomy

- Importance and applications of biosystematics in biology
- Material basis of biosystematics-different attributes
- Trends in biosystematics-
Chemotaxonomy, Cytotaxonomy, Neotaxonomy & Molecular taxonomy

UNIT II

Dimensions of taxonomic and speciation characters

- Mechanisms of speciation in panmictic and apomictic species
- Species concept- Species category, different species concept, subspecies and other infra specific categories
- Theories of Biological classification , Hierarchy of categories and the higher taxa

UNIT III

Procedure keys in taxonomy

- Taxonomic characters – different kinds, origin of reproductive isolation
- Taxonomic keys-Different kinds of Taxonomic keys, their merits and demerits
- Evaluation of biodiversity indices:
Shannon-Weinner index, dominance index

UNIT IV

Process of typification and different zoological types

- Systematic publication-Different kinds of publications
- International code of Zoological nomenclature(ICZN) – its operative principles, interpretation and application of important rules, Zoological nomenclature, formation of scientific names of various taxa.

SUGGESTED READING:

1. M. Koto-The. Biology of biodiversity-Springer
2. Molecular Markers, Natural History and Evolution,J.C.Avise. Chapman & hall. New York
3. E.O. Wilson-Biodiversity-Academic Press Washington.
4. G.G.-Simpson-Principle of animal taxonomy Oxford IBH Publication company.
5. E-Mayer-Elements of Taxonomy
6. Bastchelet-F-Introduction to mathematics for life scientists Springer Verlag, Berling.
7. Skoal R.R. and F.J.Rohiff Biometry-Freeman, San-Francisco.
8. Snecdor, G.W. and W.G. Cocharan Statistical Methods of affiliated-East-West Press, New Delhi.
9. Murry J.D. Mathematical Biology-Springer, Verlag, Berlin.
10. Principle of Animal Taxonomy; G.G Simpson. Oxford IBH Publishing Company.

Paper II

MZO-I02: [Structure and Function of Invertebrates]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Body Organization

- Origin of Life: Unicellular and Multicellular organism
- Type of symmetry: Body plane, Asymmetry, Radial, Biradial, Bilateral symmetry
- Fate of Blastopore: Protostome and Deuterostome
- Fate of Blastomere: Determinate and Indeterminate blastomeres
- Type of Cleavage: Radial and Spiral
- Segmentation: Pseudo, Superficial, Metameric
- Organization of coelom: Acoelome, Pseudocoelome and coelome (Schizo and enterocoelome)

Locomotion

- Flagella and ciliary movement in protozoa
- Hydrostatic movement in coelenterate, annelida and echinodermata

UNIT II

Nutrition and digestion

- Patterns of Feeding and digestion in lower metazoa,
- Filter feeding in Polychaeta, Mollusca and Echinodermata

Respiration

- Organs of respiration – Gills, lungs and trachea
- Mechanism of respiration
- Respiratory pigments

UNIT III

Excretion

- Organs of excretion: Coelomoducts, Nephridia and Malpighian tubules, Organ of Bojanus & Green gland
- Mechanism of excretion
- Excretion and osmoregulation

Nervous system

- Primitive Nervous system: Coelenterata and Echinodermata
- Advanced Nervous system- Annelida, Arthropoda (Crustacean and insecta) and Mollusca (Cephalopoda)

UNIT IV

Reproduction

- Regeneration, Asexual (Paramecium, obelia)
- sexual reproduction {Annelida, arthropoda, mollusca}

Invertebrate larvae

- Larval forms of free living invertebrates
- Larval forms of parasites
- Significance of larval forms

Minor Phyla

- Organization, General Character and significance (Ctenophora, Rhyncocoela, Entoprocta, Rotifera, Bryozoa, Phoronida)

SUGGESTED READING:

1. The invertebrates. Vol.1. Protozoa through Ctenophora, Hyman, L.H. McGraw Hill Co., New York
2. Invertebrate structure and function. Barrington, E.J.W. Thomas Nelson and Sons Ltd. London.
3. Evolution of Metazon life cycle, Jagerstain, G. Academic Press, New York & London.
4. The Invertebrates. Vol.2. Hyman, L.H. McGraw Hill Co., New York.
5. The Invertebrates. Vol.8. Hyman, L.H. McGraw Hill Co., New York. and London
6. Invertebrate Zoology Barnes, RD. W.B.Saunders Co., Philadelphia
7. A Biology of higher invertebrates, Russel-Hunter, WD. McMillan Co. Ltd., London
8. The Invertebrates smaller colomate groups, Vol.5. Hyman, L.H. McGraw Hill Co., New York.
9. Animal Parasitism. Cad. C.P.Prentice Hall Inc., New Jersey.
10. Student Text Book of Zoology. Vol.I.II and III. Sedgwick.A. Central Book Depot, Allahabad.
11. Text book of Zoology. Parker, T.J., Haswell. W.A.Macmillan Co., London.

MZO-I03: [Biochemistry]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Protein

- General properties and classification of proteins
- Amino acid structure and classification
- Structure of protein-Primary, Secondary, Tertiary and Quaternary
- Ramachandran plots
- Globular and fibrous protein- motif in globular proteins
- Proteinsequencing

Protein metabolism

- Amino acid degradation: Deamination reaction- Oxidative and non oxidative deamination reaction, transamination and transdeamination, Decarboxylation,
- Ornithine cycle of urea formation ,
- Fate of carbon skeleton of amino acids (Metabolism of individual amino acid excluded)

UNIT II

Carbohydrates: structure and biological importance of-

- Monosaccharides
- Oligosaccharides
- Polysaccharides (storage and structural polysaccharides, glycosaminoglycans)
- Glycoconjugates (glycoproteins and proteoglycans)

Carbohydrates metabolism: Enzyme reaction, regulation and importance of Glycolysis, Citric acid cycle. Pentose phosphate pathway, glycogenolysis, glycogenesis, gluconeogenesis.

UNIT III

Lipids

- Fatty acids: structure, nomenclature, acyl glycerols, wax, phospholipids, sphingolipids, glycolipids, lipoproteins
- Terpenoids and sterols: structure, properties and functions
- Functions of lipids
- Signal transducing molecules

Lipid metabolism: fatty acid oxidation, fatty acid biosynthesis, biosynthesis of triglycerides

UNIT-IV

Vitamins

- Classification, structure, occurrence and functions of fat soluble vitamins
- Classification, structure, occurrence and biological functions of water soluble vitamins
- Phenolics and alkaloids; structure, biological properties and functions

Enzymes

- Classification and nomenclature of enzymes
- Mechanism of enzyme action
- Enzyme kinetics
- Isoenzymes and co-enzymes
- Inhibition of enzyme
- Allosteric Regulation Of Enzymes
- Enzymes as biosensor Inborn error of metabolism

SUGGESTED READING:

1. Voet, D. and J.G. Voet. Biochemistry John Wiley & Sons.
2. Freifelder, D. Physical Biochemistry W.H. Freeman & Co.
3. Segal, I.H. Biochemical calculations John Wiley and Sons
4. Creighton, T.E. Protein Structure and Molecular Properties W.H. Freeman & Co.
5. Freifelder, D. Essentials of Molecular Biology
6. Wilson, K. and K.H. Goulding A Biologists Guide to Principals and Techniques of Practical Biochemistry
7. Cooper, T.G. Tools of Biochemistry
8. Hawk, Practical Physiological Chemistry
9. Garret, R.H. and C.M. Grisham. Biochemistry. Saunders college Publishers.

Paper IV

MZO-I04: [Essentials of Cytology]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Importance of Cell & Cell Theory

- Structure of prokaryotic and eukaryotic cells along with differences

Bio-membranes

- Molecular composition and arrangement functional consequences
- Transport across cell membrane: diffusion, active transport and pumps
- Co-transport by symporters or antiporters

UNIT II

Cytoskeleton

- Microfilaments, intermediate filaments and microtubules structure and dynamics
- Intracellular transport, role of kinesin and dynein
- Cell-Cell junction: Tight junction, Gap Junction, Plasmodesmata

UNIT III

Signal Transduction

- Introduction
- Cell surface receptors
- Second messenger system
- MAP kinase pathways
- Signaling from plasma membrane to nucleus

Intracellular protein trafficking and Sorting

- Protein synthesis on free and bound polysomes
- Uptake into ER
- Membrane proteins, Golgi sorting, Post translational modifications

UNIT IV

Cell cycle

- Events in cell cycle
- Mitosis and Meiosis
- Cyclin and cyclin dependent kinases and their regulation
- Chromosome remodeling

SUGGESTED READING:

1. Cell and Molecular Biology; De Robertis and De Robertis; Saunders College
2. Cell Biology; Powar, C.B.; Himalaya Publications.
3. Molecular Biology of the gene; Watson J.D; Benzamin/ Cummings
4. Molecular Biology of the Gene. I.D Watson, N.H. Hopkins, J.W. Roberts, J.A. Steiz and AM Weiner The Benjamin/Cummings Pub. Co., Inc., California.
5. Molecular Cell Biology, J. Darnell H.Lodish and D. Baltimore Scientific American Books, Inc., USA.
6. Molecular Biology of the cell. B.Alberts, D.D.Bray, J.Lewis, M.Rafif, K. Roberts and J.D.Watson. Garland Publishing inc., New York.
7. Gene IV, Benjamin Lewin. Oxford University Press, UK.
8. Molecular Biology and Biotechnology. A comprehensive desk reference, R.A.Meyers (Ed.), VCH Publishers, Inc., New York.
9. Molecular Cloning: A Laboratory Manual, J.Sambrook, E.F.Fritsch and T. Maniatis, Cold Spring Harbor Laboratory Press, New York.
10. Introduction to Practical Molecular Biology, P.D.Dabre, John Wiley& Sons Ltd. New York.
11. Molecular Biology Lab Fax, T.A.Brown (Ed.), Bios Scientific Publishers Ltd., Oxford.

PRACTICALS

PAPER I [Principles of Biosystematics & Taxonomy]

- Identification, Classification and study of the animals from major invertebrate groups (Protozoa to Hemichordate including minor phyla) using museum specimens, slides, modals or charts.

- **SPECIMENS:**

- PROTOZOA -Gregarines, Monocytes, Creation, Euplotes, Dominion, Noctiluca, Radiolarian, Senior, Opalina

POREIRA- Sectional view of sycon (T.S., L.S.), Grantia (T.S.)

- CNIDARIA-Slides of Obelia polyp and medusa, Pennaria, Aurelia Tentaculocytes Museum specimens of Virgularia, spongodus, Zoanthus, Favia.

HELMINTHES- Slides of TemnocephalaMuseum Specimens of Ascaris lumbricoides ,Taenia Solium, Planaria

- ANNELIDA- Slides of Ozonbranches, Glossophonia.Museum Specimens of Eunice, chloehava. Polynoe, Terebella. Eurythoe.

- ARTHROPODA- Slides of Cytops, Daphina, Chelifer, section of Peripatus Museum Specimens of Balanus Lepas, Palinurus, Uca, Pycna, Hippa, Gongylus, Belostoma. Limulus, Squilla, Eupagurus.

- MOLLUSCA-Museum Specimens of Dolobella, Pteria, Nerita, Sanguinolaria, Chicoreus, Ficus, Lambis, Tridacna, Onchidium, Oliva, Murex, Turritella, Bulla, Cardium, Arca. ECHINODERMATA-Museum Specimen of Linkia, echinodiscus, Holotharia, Antedon. MINOR PHYLA-slides of Bugula, Plumatalla, Cristatella, Pectinella, Museum Specimen of Phoronis, Dendrostoma.

- LARVAE-Planula, Redia, Cercaria, metacercaria, Trochopore, Nauplius, Zoea, Mysis, Phyllosoma, Trilobite larvae of limulus, Antilon, Veliger, Bipinnaria, Ophio and Echinopluteus, Auricularia, tornaria

- Composition assessment of taxonomic diversity in a habitat. (grassland, arid land, wet land etc.)

- Use of taxonomic keys to identify t least 6-10 orders of insects (upto order level only).

- Visit river/pond/ sea

PAPER II [Structure & Function of Invertebrates]

Virtual dissection of invertebrates using computer software

OR

Dissection: Nervous System, Leech, crab of Scorpion, Mytilus, Sepia, Aplysia, Sea Urchin, Holothuria, Star Fish.

• Mounting: Hydra, Obelia, Sertulria, companvlaria, tubvlaria, Miracidivm larvae, cercaria, Radia Rarvae, Cyclops, Daphnia, Zoea, Megalopa Musis planktons

PAPER III [Biochemistry]

- Identification of protein, carbohydrate and lipid in various tissues/food materials
- Identification of different kinds of mono-di and polysaccharides in biological /food materials.
- Verification of Beer-Lambert's Law using any colour solution
- Determination of absorption maxima of a coloured solution
- Plotting of standard curve
- Quantative estimation of the following in various tissues
- Carbohydrates: Glycogen, glucose and ascorbic acid.
- Proteins: Total proteins
- Lipids: Total lipid, Phospholipids and cholesterol.
- Nucleic acid: DNA and RNA
- Enzymes: Acid and alkaline phosphates
- Paper chromatography: unidimensional chromatography, using amino acids from purified samples and biological materials.
- Paper /PAGE electrophoresis, determination of serum protein through paper /PAGE electrophoresis
- Determination of pH of different solutions

PAPER IV [Essentials of Cytology]

- Preparation of different cell types: Liver Hepatocytes , Adipocytes, Spleen cells
- Study of Polytene chromosomes in salivary glands of Chironomus larva/Drosophila
- Light microscopic examination and preparation of tissue sections.
- Study of mitotic and meiotic chromosomes from permanent prepared slides.
- Preparation of slides for mitotic study.
- Preparation of slides for meiotic study in the testis of grasshopper.
- Preparation of multipolar nerve cell from the spinal cord of a mammal.
- Barr body preparation in buccal epithelial cells.

**Semester- II
THEORY**

Paper I

MZO-202: [General Physiology]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Respiration System

- Pressure changes during Pulmonary Ventilation, Factors affecting Pulmonary Ventilation
- Breathing Patterns and modified Respiratory Movements
- Lung volumes and capacities
- Physical Principles of Gas Exchange; Diffusion of Oxygen and Carbon Dioxide Through the respiratory Membrane
- Transport of Oxygen and Carbon Dioxide in Blood and Tissue Fluids
- Regulation of Respiration and Respiratory center

Circulatory system

- Blood cells: ultra structure , Physiology and functions
- Hemostasis: Vascular Spams, Vasoconstriction, platelet activation cascades and Blood clotting
- Heart Structure- Location, Chambers and Heart valves
- Overview of the Circulation- Systemic & Pulmonary
- Cardiac Cycle, Cardiac output
- ECG-Correlation of ECG waves with Arterial and ventricular systole

UNIT II

Digestive System

- General Principles of Gastrointestinal Function-Motility, Nervous Control
- Propulsion and Mixing of Food in the Alimentary Tract
- Secretary Functions of the Alimentary Tract
- Digestion and Absorption in the Gastrointestinal Tract
- Physiology of Gastrointestinal Disorders

Excretion and Osmoregulation

- Physiology of ultrafiltration, Reabsorption, tubular secretion.
- Counter current theory of urine concentration, Regulation of urine formation.
- Method of Urine formation, Nitrogenous wastes
- Renal regulation of acid-base balance
- Osmoregulation in different mammalian groups;

UNIT III

Nervous system

- Neuron & Neuroglia- Types and structure
- Genesis of membrane potential & Propagation of Nerve impulse
- Signal Transmission at synapses
- Neurotransmitters- Small molecule and Neuropeptide Neurotransmitters

Muscular system

- Types, properties and function of muscles
- Functional architecture of skeletal muscles
- Biophysical and biochemical events during muscular activity
- Neuromuscular Junction, Muscle metabolism
- Control of Muscle Tension, Muscle tone
- Types of Muscle Skeletal Fibers
- Elementary idea of Sports Physiology

UNIT IV

Endocrinology & Reproduction

- Hormones - General classes of hormones, Mechanisms of hormone action , Chemical correlation and neuroendocrinal control

- Hypothalamic and Pituitary hormones- Hypothalamic hormones ,Hypophyseal hormone, Hypothalamo-hypophysial system
- Thyroid hormones - Biosynthesis and function of T3/T4, Role of thyroid hormones in metabolism
- Pancreatic hormones - Structure and function of insulin and glucagon, Role of hormones in glucose metabolism
- Adrenal hormones - Structure and functions of cortical hormones, Structure and functions of medullary hormones
- Reproductive hormones - Sex steroids,
- Hormonal control of male and female reproduction - Implantation, parturition and lactation in mammals.

Stress physiology

- Basic concept of environmental stress-elastic & plastic strain
- Homeostasis, Physiological response to body exercise
- Meditation, yoga and their effects

SUGGESTED READING:

Paper II

MZO-201: [Environmental Biology & Ethology]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

- Ecological law of minimum and law of tolerance
- Ecological niches, overlapping of niches, ecotone
- Energy flow, food chain, food web and trophic levels, ecological pyramids
- Nutrient cycles in nature -carbon, nitrogen, phosphorus and water.
- Ecozones of India -habitat and fauna
- Population ecology:
 - Characteristics of a population
 - Population growth curves, population regulation
 - Life history strategies (r and k selection)

7. Environmental Pollution - air, water, noise and radiation (electromagnetic and ionizing)
carbon foot print

UNIT II

Biodiversity

- Species diversity, ecosystem diversity, genetic diversity and molecular Diversity.

- Alpha, Beta and Gamma Diversity
- Biodiversity indices. Measuring -species richness, species evenness Simpson's diversity Index and Shannon's diversity index
- Biodiversity act of India and Biodiversity hot spots in India (with special reference to Western Ghats and North east), UNESCO heritage sites (Kaziranga National Park)

Ecological communities: (succession, zonation, environment, biota and adaptations)

- Terrestrial
- Fresh water
- Marine and estuarine

Climatic Changes -El Nino and La Nina, Earthquakes and Tsunami

Elementary knowledge of : Wildlife acts and schedules, CITIES, TRAFFIC, WWF, Ramser convention, IUCN, ZSI, ZAI, ENVIS, IGCMC, Project Tiger, Biosphere reserves, world heritage sites and hot spots.

UNIT - III

Ethology

- Scientists and their works: Konrad Lorenz, Niko Tinbergen, Karl Von Frisch, Skinner B F and Harlow Harry, Richard Dawkins, EO Wilson, Desmond Morris
- **Concepts of Ethology** (SS, FAP, ASE, IRM), Flush Toilet model ; Genes and behaviour; Evolution of behaviour, Development of behavior
- **Neuroethology**
- Methods of studying brain and behaviour: neuroanatomical, neurophysiological and neurochemical
- Basic knowledge of EEG, LASER, PET,CAT , MRI and nuclear medicine imaging
- Mammalian Brain and Behaviour, Limbic system and hypothalamus
- Sleep - arousal and reticular formation
- Definition of Social behaviour
- Properties and advantages of social grouping, social group of monkeys
- Sociobiology-Darwinian fitness, individual fitness, kin selection, group selection, cooperation, reciprocation, altruism , reciprocal altruism, Proximate and Ultimate causations
- Home range, territory, core area and aggression
- Human behaviour

UNIT IV

- Feeding and sexual strategies in animals
- Parental care in animals
- Communication in animals - vocal, tactile, visual and chemical Learning
- Introduction and definition
- Types - Habituation, trial and error ,conditioning , cognition and imprinting
- Short and long term memory, neural mechanism of learning

Paper III

MZO-203: Molecular Biology, Biotechnology & Bioinformatics

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT- I

DNA Replication

- Prokaryotic & eukaryotic DNA replication
- Mechanics of DNA replication
- Enzymes and accessory proteins involved in DNA replication

Transcription

- Prokaryotic and Eukaryotic transcription
- RNA polymerases, General and specific transcription factors

Post transcriptional modification in RNA

- 5' cap formation
- Transcription termination

- 3' end processing and polyadenylation
- Splicing

UNIT II

Translation

- Genetic code
- Prokaryotic and eukaryotic translation
- Mechanisms of Initiation, Elongation and termination
- Regulation of Translation
- Co and post translational modifications of protein

Recombination and repair

- Holiday junction, Gene targeting, Gene disruption
- FLP/ FRT and Cre/lox recombination
- Rec A and other recombinases

UNIT III

Molecular mapping of Genome

- Genetic and physical maps
- Southern and fluorescence in situ hybridization for genome analysis
- Molecular markers in genome analysis: RFLP, RAPD and AFLP analysis

Transgenic animals and knockouts

- Production
- Applications
- Embryonic stem cells
- Care and breeding of experimental animals including bioethics

Assisted reproduction technologies

- Embryo sexing and cloning
- Screening for genetic disorders
- ICSI, GIFT etc.
- Cloning of animals by nuclear transfer

UNIT IV

- Bioinformatics - Biological /Specialized Database - Servers for Bioinformatics (NCBI, EBI, Genoment)
- Sequence analysis techniques - Genomics - Proteomics.
- Practical aspects of multiple sequence alignment
- Phylogenetic analysis

- Predictive methods using Nucleotide sequences of Mice and Men: Navigating public physical mapping

Paper IV

MZO-204: [Genetics and Molecular Evolution]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT- I

Mendelian Genetics

- Modern Mendelism and non Mendelian pattern of inheritance.
- Patterns of gene inheritance, multiple alleles, linkage and crossing over, inheritance of sex and autosomal genes, cytoplasmic inheritance.
- Conjugation, transformation & transduction in bacteria and their use in preparation of genetics maps.
- Recombination frequency, genetics in animal breeding(inbreeding and out breeding) heterosis, expressivity, pentrance.

UNIT II

- Human Genetics: Pedigree analysis, karyotype analysis, Lyon Hypothesis,
- Genetics of ABO system, Rh disease and inheritance, sickle hemoglobin and inheritance, Thalassemias,
- Human Genome Project, DNA finger printing
- Genetic disorders- Patau, Edward's, Chriduchat syndrome, Philadelphia Chromosome.

UNIT III

- Population Genetics: Hardy-Weinberg law of genetic equilibrium

Detailed account of destabilizing forces –

- Natural selection , Mutation, Genetic drift, Migration , Meiotic drive

Genetics of Quantative traits in populations :

- Analysis of quantative traits
- Quantative traits and natural selection,
- Genotype-environment interactions,
- Inbreeding depression and heterosis,

Molecular analysis of quantative traits & Phenotypic plasticity

Unit IV

Molecular Evolution : Gene Evolution, Multigene families, molecular drive, Micro-and Macro-evolution, convergent- divergent evolution

Molecular phylogenetics: Phylogenetic trees, Phylogenetic inference-Distance methods, parsimony methods, maximum likelihood method, Molecular clocks.

SUGGESTED READING:

12.Dobzhamsky, T., Alaya, F.J. Stebbins, .G.L., Valentine,J.M., Genetics and Origin of species, Surjeet Publication, Delhi.

PRACTICALS

Paper I [General Physiology]

- Demonstration of the use and operation of oscilloscope for recording neuroelectric activity and electrocardiogram.
- Kymographic recording of muscle twitch , summation of twitches, chronic contractions, tetanus, fatigue and stair-case phenomenon from the sciatic nerve gastronemius muscle preparation of frog.*
- Demonstration of Kymographic recording of the frog heart beat and the study of the effect of electrical stimulation, hot and cold, drugs, etc*
- Study of spinal and convulsive reflexes in frog* *In case, frogs become available students may be asked to perform the various exercises. Otherwise following CAL exercise may be included (please see E-pharm programme)
- The effect of K^+ , Ca^{++} , ACh and Epinephrine on the isolated heart of frog and conclude your data with the graphic representation
- The effect of various doses of ACh and Nor-epinephrine on Blood pressure, Heart Rate and Respiratory Rate of the dog.
- The effects of Atropine, Epinephrine, Ephedrine and Eserine on Rabbit's eyes and other such exercise can be framed from the E-Pharm software.
- Photometric determination of haemoglobin in blood sample.
- Determination of MCV, MCH, MCHC and colour Index of the given sample of blood.

- Demonstration of the blood clotting time, erythrocyte sedimentation rate, haemolysis and crenation.
- Determination of the urea in urine
- Determination of the glucose in urine.
- Radiation uptake in various tissues: elementary idea of using radioactivity detection instruments.
- Study of digestive enzymes in different parts of the alimentary canal.

Paper II [Environmental Biology & Ethology]

Estimation of alkalinity, acidity, dissolved oxygen, chloride
Ph in water, nitrogen, phosphorous

- Microbial analysis in soil

A visit to a sanctuary/National Park. (Preparation of Report)

Ethology

Learning by trial and error in animals using maze and jumping box

- Study of movement of fish in aquarium
- Study of courtship in birds
- Food preference in tribolium
- Pheromones in earthworms
- Study of imprinting in chicks

Paper III [Molecular Biology, Biotechnology & Bioinformatics]

- Squash and smear preparations of testis of cockroach / grasshopper aceto-orcein and Fuelgen staining of these preparations.
- Study of mitosis in onion root tip and meiosis in testes of insect or mammal.
- Study of giant chromosomes in the salivary gland of Chironomus larva or Drosophila
- Vital and supravital staining (with Neutral red and Janus green (B) of cells of the testis of an insects or mammal to study the mitochondria.
- Preparation of multipopular nerve cell from the spinal cord of a mammal.
- Study of prepared microscope slides, including those showing various cell types, mitosis, meiosis and giant chromosomes.
- Study of PCR
- Extraction of Genomic DNA
- Restriction digestion of λ DNA

Bioinformatics

Study of the tools used in bioinformatics.

- Retrieve the sequence for the database.
- Genome sequencing techniques.
- Methods of sequence alignment.
- Nucleotide and protein Sequence databases.
- Gene bank flat file format.
- Data mining in proteomics.

Paper IV [Genetics and Molecular Evolution]

Numerical based on theory

Semester III

Paper I

MZO-301: [Biology of Chordates]

Duration: 3 hrs.

Max.

Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

Unit I

- Origin and outline classification of chordates.
- Origin, evolution and adaptive radiation of chordates
- Origin, evolution and general characters Agnatha : Ostrachoderms and cyclostomes
- The early Gnathostomes (Placoderms)

Unit II

- A general account of the Elasmobranchii, Holocephali, Dipnoi and Crosspterygii.
- Adaptive radiation in bony fishes
- Origin, evolution and adaptive radiation of Amphibia
- Parental care in Amphibia
- Neotany in Amphibia

Unit III

- Origin, evolution of Reptiles : Seymouria and cotylosaurai
- Skull of reptiles
- Venom in ophidians
- Dinosaurs
- Living Reptiles : A brief account of Rhynchocephalia, Chelonia, Crocodilia and Squamata

Unit IV

- Origin, evolution of Birds
- Origin of Flight : Flight adaptation
- Flightless birds
- Modification of beak, feet and palate in birds
- Origin of Mammals : Primitive mammals(Protheria & Metatheria)
- General account on adaptive radiations in eutherian mammals
- Evolution of man

Paper II

MZO-302 [Genes & Differentiation]

Duration: 3 hrs.

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

- Introduction to animal development
- Problems of development biology
- Develop patterns in metazoans
- Development in unicellular eukaryotes
- Cleavage types

- Comparative account of gastrulation
- Early vertebrate development

The central nervous system and the epidermis

- Formation of the Neural Tube
- Differentiation of the Neural Tube
- Tissue Architecture of the Central Nervous System
- Neuronal Types
- Development of the Vertebrate Eye
- The Epidermis and the Origin of Cutaneous Structures

Paraxial and intermediate mesoderm

- Paraxial Mesoderm: The Somites and Their Derivatives
- Myogenesis: The Development of Muscle
- Osteogenesis: The Development of Bones
- Intermediate Mesoderm
- Lateral Plate Mesoderm

UNIT II

- Cell commitment and differentiation
- Cell specification in nematodes
- Germ cell determinants
- Germ Cell Migration
- Progressive cell- Cell interaction and cell specification fate

Body Axes

- Establishment of body axes in mammals and birds
- Proximate tissue interactions
- Genetics of axis specifications in *Drosophila*
- Homeobox concept in different phylogenetic groups

Tetrapod limb development

Hormones as mediators of development

Amphibian metamorphosis

Insect metamorphosis

Ovarian luteinization and mammary gland differentiation.

UNIT III

Environmental evolution and animal development.

- Environmental cues and effects
- Malformations and disruptions
- Changing evolution through development modularity
- Developmental constraints

- Creating new cell types-basic evolutionary mystery

Biology of sex determination

- Chromosomal sex determination - Mammals and Drosophila
- Testis determination genes
- Ovarin development
- Secondary sex determination in mammals.
- Environmental sex determination

UNIT IV

- Cell diversification in early embryo
- Xenopus blastomeres
- Morphogen gradients
- Totipotency & Pluripotency
- Embryonic stem cells.
- Renewal by stem cells-epiderms
- Skeletal muscle regeneration
- Connective tissue cell family
- Hemopoietic stem cells
- Stem cell disorders
- Blood cell formation
- Bone marrow transplants
- Gene therapy

SUGGESTED READING:

1. An Introduction to Embryology :Balinsky, B.I. : W.B. Saunders, Delhi.
2. Development Biology. Berrill, N.J. McGraw Hill book Com. New York.
3. Modern Embryology :Bodemer, C.W. : Holt Reinchart and Winstom, Inc. New York, Chicago.
4. Developmental biology : Scott. F. Gilbert.

PRACTICALS

Paper I[Biology of Chordates]

1. Virtual dissections using computer software

Dissections:-

- Cranial Nerves of *Wallago attu* or any other locally abundant fish
- Neural Complex of *Herdmania*
- Accessory respiratory organs of *Heteropneustes fossilis*
- Labyrinthine organs of *Anabas testudinus*

2. Museum specimens:

Lower Chordates: *Salpa* Asexual and Sexual stage, *Dolliolum* oozoid, *Botrylus*, *Herdmania*, and *Amphioxus*.

Pisces: *Petromyzon*, *Myxine*, *Rhinobatus*, *Pristis*, *Trygon*, *Chimaera*, *Polydon*, *Acipenser*, *Amia*, *Lepidosteus*, *Protopterus*, *Lepidosiren*, *Neoceratodus*, *Notopterus*, *Exocetus*, *Echeneis*,

Pleuronectes, Mestacembelus, Diodon, Tetradon, Ostracion, Lophis, Syngnathus, Hippocampus, Anguilla, Labeo, Ophicephalus.

Amphibia: Ichthyophis, Necturus, Proteus, Ambystoma, Axolotal, Salamander, Siren, Alytes, Pipa, Bufo, Hyla, Rhacophorus, Rana.

Reptilia: Testudo, Chelonea, Sphenodon, Calotes, Hemidactylus, Phryosoma, Draco, Varanus, Chamaleon, Cobra, Hydrophis, Rattle Snake, Viper, Pit Viper, Krait, Eryx, Gravidalis.

Aves: Taylor Byrd, Indiana Hoel, Jungle fol, Pavois, Columbia, Psittacidé, Wood paquer, Bubo (Horme l), Archéoptéryx, Flamingant.

Mammals: Ornithorhynchus, Echdina, Macropus, Hedgehog, Manis, Loris, Bat, Mongoose, Hystrix, Otter.

3. Microscopic Slides:

Lower Chordates: Herdmania spicules, Herdmania tadpole larva, Amphioxus T. S. passing through oral hood, pharynx, testes, ovary, intestine and caudal regions, Ammocoete larva whole mount.

Pisces: Placoid scale, Cycloid scale, Ctenoid scale.

Amphibia: V S skin of Frog, T S passing through stomach, duodenum, intestine, liver, pancreas, lung, kidney, testes, ovary, spinal cord, bone.

Reptelia: V S skin of lizard.

Aves: V S skin of bird, contour feather, down feather.

Mammals: V S skin of mammals, T S passing through stomach, intestine, liver, pancreas, kidney, testes, ovary, thyroid gland, adrenal gland, pituitary gland, lung, bone, spinal cord, Blood smear, Simple cuboidal epithelium, Simple columnar epithelium, Simple squamus epithelium, Adipose tissue, Reticular tissue.

4. Comparative Osteology:

Comparative account of Axial and Appendicular skeletons of Frog, Varanus, Fowl and Rabbit (both articulated and disarticulated).

Skull of Reptiles (Anapsida and Diapsida).

Palate in Birds.

Skull and lower jaw of Carnivore mammal & herbivore mammal.

Paper II[Genes & Differentiation]

Study of development of Frog

- Preserved Material available: Egg, Cleavage, Blastula, Gastrula, Neurula, Tail bud, Hatching, Mature tadpole larva, Metamorphic stages, Froglet
- Histological slides: Cleavage, Blastula, Gastrula, Neurula, Tail bud stage

Study of development of Chick

- Whole mounts: 18, 21, 24, 33, 72 & 96 hrs of incubation period embryos
- Study of the embryo at various stages of incubation in vivo by making a window in the egg shell

- Exercise to demonstrate developmental stages of living embryo after removal of blastoderm from the egg
- Study of various Foetal envelopes in a 10-12 day old chick embryo(Amnion, Chorion, Allantois, Yolk sac)

Core Elective I

MZO-303A [Basics of Toxicology]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

- **Introduction to Toxicology**
 - I) Historical overview & scope of toxicology
 - II) Classification of Toxic agents
 - III) Spectrum of Undesired effects
- **Chemical Interaction**
Additive, Synergistics, Potentiation & Antagonism

- Dose Response & Dose Response curves

UNIT II

- **Measuring of Animal Toxicity**

Acute, Subacute, Chronic (carcinogenesis, Mutagenesis, Teratogenesis) & Reproductive Toxicology

- **Mechanism of Toxicology**
 - I) Absorption & Distribution
 - II) Metabolism of Toxicants
 - III) Reaction Metabolites
 - IV) Elimination

UNIT III

- **Biotransformation of Xenobiotics**

- Phase I Enzyme Reaction –,
- Oxidation - Cytochrome P-450- Dependent Monooxygenase system, Flavin containing Monooxygenase, Nonmicrosomal Reaction, Cooxidation during Prostaglandin Biosynthesis.
- Reduction
- Hydrolysis
 - Phase II Enzyme Reaction-
Glucuronidation, Sulfation, Methylation, Acetylation, Amino acid conjugation, Glutathion conjugation & Phosphorylation

UNIT IV

Target organ Toxicity

- I) Hepatotoxicity : Susceptibility of the Liver , Types of Liver injury,Biochemical mechanism, Example of Hepatotoxicants.
- II) Nephrotoxicity: Susceptibility of Kidney, Renal physiology &function
Example of Nephrotoxicants.
- III) Pulmonary toxicity: Susceptibility of the Lung, Types of toxic response, Example of Lung toxicants.
- IV) Nervous system : Nervous system structure & function ,Vulnerability of Nervous System , Neurotoxicity, Example of Neurotoxicants.
- V) Reproductive toxicity: Reproductive processes(Development ,Male and Female Reproduction , Example of Reproductive Toxicants.

MZO-303 B [Fundamentals of Radiation]**Duration: 3 hrs****Max. Marks: 70**

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I**Atomic structure**

- Mass Number and atomic mass
- Isotopes, isomers, isobars
- Subatomic particles
- Excitation and ionization
- Nuclear forces and nuclear structure

Types of Radiation

- A) Nuclear Radiation B)X –Ray

Radioactivity

- Natural, Artificial and Half life
- Background Radiation
- Units of Radiation

Unit II

LET and RBE

Radiation Dosimetry

Detection and Measurement of Radiation

- G.M.Counter
- Scintillation Counter
- Proportional counter
- Gamma Ray Spectrophotometer
- Radioautography
- Radioimmunoassay

UNIT III

Radiation chemistry

- Radiolysis of water.
- Formation of oxygen reactive species
- Oxygen effect
- Direct & indirect effects

Radiation Monitors

- Film Badge
- Pocket dosimeter
- Thermo luminescence Dosimeter
- Area Monitoring

Unit IV

Radioactive contamination and decontamination

- Sources of contamination
- Control of contamination
- Contamination monitoring
- Decontamination

Radioactive waste management

- Nuclear fallout
- Types of radioactive waste
- Discharge of radioactive waste
- Management of nuclear waste

SUGGESTED READING:

Paper III

MZO-303 C [Systematics and Ecology of Insects]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Historical review of insect classification .basis of insect classification.

Phylogeny of Arthropoda and Hexopoda .Introduction to primitive insects.

Detailed classification of important and selected super families and families of the following orders- Orthoptera, Isoptera, Hemiptera, Coleoptera, Lepidoptera, Diptera and Hymenoptera.

UNIT-II

Social life in Isoptera and Hymenoptera. Life cycle of locusts and aphids.
Origin and evolution of insects with special reference to fossil insects. Causes of success of insects.

UNIT-III

Ecology of insects-

- (a) Effect of physical factors.
- (b) Intra and inter specific relations. (Biotic factors)
- (c) Insect plant interaction.

UNIT-IV

Population ecology: Population dynamics, size, fluctuation, biogeography, community ecology, species interaction, community structure, diversity.

Biochemical adaptations to environmental stress (metamorphosis, diapause, polymorphisms, swarms, outbreaks and migration).

SUGGESTED READING:

1. The Insect: Structure and function by R.F. Chapman
2. Comparative Insect physiology, Biochemistry and Pharmacology .Vol :1-13.
Edited by G.A. Kerkut and L.I. Gilbert.
3. Entomophagous Insect by Clausen
4. Entomology by Gilbert
5. Principles of Insect Physiology by Wigglesworth.
6. Fundamentals of Entomology by Elzinga
7. Hand book of economic Entomology for South India by Ayyar.
8. Insect cytogenetics by R.E.F.Symposium.
9. Insects and plants by Sting, Lawton and southwood.
10. Insect and hygiene by Busvine.
11. Insect Physiology by Wigglesworth.
12. Insect morphology by Mat Calf and Flint
13. Applied Agricultural Entomology by Dr. Lalit Kumar Jha

MZO303D [Molecular biology of the Gene]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

DNA

- Equivalence rule
- Primary & secondary structure

- Unusual secondary structure (Slipped and cruciform structure; triple helix DNA; Tetraplex) and G-quadruplex.
- Types (A,B, &Z DNA) and flexibility
- Forces stabilizing the structure: Denaturation and renaturation; base pairing; hydrophobic interactions and Ionic interactions
- Packing of DNA: Nucleosome, solenoid & scaffold

UNIT II

DNA replication

- Prokaryotic and Eukaryotic replication
- Mechanism of DNA replication including end replication
- Enzyme and accessory proteins involved in DNA replication
- Drugs that effect replication

DNA repair

- Direct Reversal of DNA Damage
- Excision Repair
- Translesion DNA Synthesis
- Recombinational Repair

UNIT III

DNA binding proteins and gene expression

- DNA binding domains
- Homeodomain proteins
- Zinc finger proteins
- Winged-helix (Forked helix) proteins.
- Leucine zipper proteins
- Helix loophelix proteins

Role of Topoisomerase enzyme

UNIT IV

Regulation of Gene expression

- Operon concept
- Catabolic repression
- Positive and negative regulation
- Inducers and corepressors

- Regulation by attenuation: *his* and *trp* operons

ESSENTIAL READINGS:

1. Molecular Biology of the gene; Watson J.D.; Benzamin/ Cummings.
2. Molecular Biology of the Cell (2nd Edition) B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts, and J.D. Watson, Garland publishing. Inc., New York, 1994.
3. Molecular Cell biology (2nd Edition) J. Darnell, H. Lodish and D. Baltimore, Scientific American Books, USA, 1994.
4. Cell & Molecular Biology, (8th edition), E D P Roberties & E M F Roberties, Lippincott Williams & Wilkins, 2005
5. The cell, (5th edition), R C Swanson and P C Webster , Prentice hall of India Pvt. Ltd., 1990
6. Cell and Molecular Biology, (3rd edition), P Sheeler and D E Bianchi, John Wiley & Sons, Inc, 1987
7. Cell and Molecular Biology: Concepts and Experiments, (4th edition), G Karp, John Wiley & sons, Inc., 2005
8. The cell. A Molecular Approach, (4th edition), G H Cooper and R E Hausman, ASM Press, 2007
9. Gene VII, Indian eds. Lewin, B. Oxford university press, Bombay

Core Elective II

MZO-304 A [Environmental Pollution & Legal frame work]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Air Pollution: Atmospheric composition and stratification Sources, Species of pollutants, classification – criteria and specific pollutants. Effects of air pollution on plants, human health, materials and ecosystems. Synergistic effects of air pollutants. Air pollutant dispersion, Plume behavior, Temperature inversion, Lapse Rate and Stability, Wind Rose.

UNIT-II

Water Pollution: Sources, species and water quality parameters. Organic and inorganic pollutants, sewage, leachates, eutrophication, heavy metals. Transport of pollutants in aquatic ecosystems. Bioaccumulation, Biomagnification. Bioindicators. Characteristics of domestic, industrial and agricultural wastes, their effects on receiving water bodies, Waterborne diseases. Thermal Pollution: Sources, Effects of pollution on human and animals.

UNIT-III

Noise Pollution: Sources, sound pressure level, decibels, intensity, duration, pitch, noise-spectra-octave bands, noise-monitoring-sound level meter, frequency weighting networks, equivalent continuous noise level and other noise indices. Effects of noise pollution on human and animals. Permissible standards.

Thermal, Radiation and Space Pollution: Sources, Effects of pollution on human and animals.

UNIT IV

Acts, Rules and Regulations: Acts, rules and amendments thereof - Wildlife (Protection) Act 1972, Water (Prevention and Control of Pollution) Act 1974; Forest Conservation Act 1980, Environment (Protection) Act 1986. Air (Prevention and Control of Pollution) Act 1981; Bio-Medical Waste (Management & Handling) Rules, 1998; Transboundary Movement Rules, 2008. Hazardous waste handling Rule, NGT

MZO-304B [Biological Effects of Ionizing Radiation]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

Unit I

Effects of radiation at the molecular and the cellular level

Basic radiation chemistry

Breakage of chemical bonds by excitation ionization; biologically important elements; direct and indirect effects of radiation: generation of free radicals, interaction with DNA; interaction with proteins and lipids

Effects of radiation on cells

Chromosomes; DNA; point mutations, chromosome breaks, mitosis; mitotic dysfunction, cell death; consequences of cell death; consequences of cell damage, DNA repair; cell sensitivity; radiosensitizers and protectors; chromosome aberrations as biological indicator of dose

Unit II

Deterministic effects

Effects of whole body irradiation

General dose-response curve; threshold; severity; acute radiation syndrome; haematopoietic system; gastrointestinal tract; central nervous system

Effects of partial body irradiation

Skin (erythema, ulceration, effect of radiation type and radiation quality); thyroid, lung, eye lens; gonads; threshold doses; effect of fractionation and dose rate; case histories (accidental exposures)

UNIT III

Stochastic somatic effects

Stochastic effects

Cancer induction and development; sources of data: atomic bomb survivors, dial painters, medical exposures, miners, animal data

Dose-response relationship; absolute and relative risk models; dose and dose rate effectiveness factors; ICRP risk factors, fatal and non-fatal cancers

Stochastic hereditary effects

Stochastic effects

Elementary genetics; natural mutations; production of gametes and damage to chromosomes (examples); gene mutations; sources of data: man and animals; concept of doubling dose; UNSCEAR and ICRP approach; ICRP risk assumptions: subsequent generations and severity

Unit IV

Effects on the embryo and foetus

Radiation effects

Sensitivity at different stages of development; brain development and retardation; induction of leukaemia and cancers

Epidemiological studies and issues

Epidemiological studies

Statistical requirements, current types of studies; association and confounding factors, power and precision; prospects and pitfalls

MZO-304C [Insect Morphology, Physiology, Embryology and Development]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

General organization of insect body,

- Integument
- Head: sutures and area of cranium, tentorium, Gnathal appendages.
- Thorax: Legs and their modifications, wings and wing coupling.

UNIT-II

Digestive system

- Alimentary canal and its modifications
- Physiology of digestion.

Physiology of circulatory system

Excretory system and its modifications

Respiratory system and its modifications, adaptations for aquatic respiration.

UNIT-III

Nervous system and its modifications.

- Morphology and physiology of neuroendocrine system.
- Sense organs: Mechanoreceptors, Chemoreceptor.
- Auditory organs, light producing organ, sound producing organ, visual organ (Compound eye and ocelli).

Muscular system and distribution of muscles.

UNIT-IV

Reproductive system. Morphology and physiology of male and female, reproductive system, its associated ducts and glands and external genitalia.

Embryology: - Structure of egg, embryonic and post embryonic development, Types of larvae, pupae and metamorphosis.

SUGGESTED READING:

1. The Insect: Structure and function by R.F. Chapman
2. Comparative Insect physiology, Biochemistry and Pharmacology .Vol :1-13.
Edited by G.A. Kerkut and L.I. Gilbert.

9. Insects and plants by Sting, Lawton and southwood.
10. Insect and hygiene by Busvine.
11. Insect Physiology by Wigglesworth.
12. Insect morphology by Mat Calf and Flint
13. Applied Agricultural Entomology by Dr. Lalit Kumar Jha

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

RNA and Transcription

- Types and structural features (mRNA, tRNA and rRNA)
- Prokaryotic transcription
- Eukaryotic transcription
- Regulatory elements and mechanism of transcription regulation
- Transcription termination – attenuation and antitermination
- Drugs inhibiting transcription

UNIT II

Post-transcriptional modification in RNA

- 5'- Cap formation
- End processing and polyadenylation
- Splicing and editing
- Nuclear export of mRNA
- RNA stability
- Inhibitors of RNA synthesis

UNIT III

Translation

- Genetic code
- Prokaryotic and eukaryotic translation
- Regulation of translation
- Inhibitors of protein synthesis
- Post translational modifications

UNIT IV

Protein Sorting and Transport: The endoplasmic reticulum

- The Endoplasmic Reticulum and Protein Secretion
- Targeting Proteins to the Endoplasmic Reticulum
- Insertion of Proteins into the ER Membrane

- Protein Folding and Processing in the ER
- Quality Control in the ER
- The Smooth ER and Lipid Synthesis
- Export of Proteins and Lipids from the ER

ESSENTIAL READINGS:

8. The cell. A Molecular Approach, (4th edition), G H Cooper and R E Hausman, ASM Press, 2007
9. Gene VII, Indian eds. Lewin, B. Oxford university press, Bombay

Practicals of Special papers

Toxicology

1. Determination of alkalinity and acidity of water
2. Determination of dissolved oxygen in water
3. Determination of chloride in water
4. pH estimation of water
5. Estimation of nitrogen and phosphorus in water sample
6. Determination of Total Dissolved Solids in Waste Water Sample
7. Determination of Chemical Oxygen Demand in Waste Water Sample
8. Analysis of Total Hardness of Waste Water Sample
9. Analysis of Waste Water/Sludge for Heavy Metals
10. Determination of LC /LD 50 Assay
11. Case Study

Radiation Biology

1. Knowledge and use of the various instruments. Geiger-Muller counter, Scintillation counters, Survey meter, Single-channel gamma spectrometer, Cobalt camera.
2. Finding out the operating voltage of the G-M tube.
3. Calculation of Inverse Square Law
4. Determination of the resolving time of the G-M tube.
5. Absorption of beta and gamma rays
6. Determination of Backscattering factors
7. Histopathological, histochemical and biochemical studies of various tissues after external irradiation.
8. Paper radiochromatography: use of solvents, use of reagents, interpretation of chromatogram, scanning procedure

Entomology

Anatomy

- Cockroach – Endocrine complex, Nervous System, Alimentary Canal
- Grass hoper - Nervous System, Reproductive System, Alimentary Canal
- White grub- Nervous System

Permanent mounting

Mouth Parts

- Biting &Chewing (Cockroach)
- Piercing & sucking – (Mosquito)
- Siphoning – (Butterfly)
- Tympanum & Spiracle (Grasshopper)
- Antennae, wings and legs of Mosquito, butterfly, grasshopper, cockroach
- Whole mounts of insects (Lice, ants, termite, bedbug, mosquito etc.)

Insect rearing

- Tribolium
- Rhizopertha
- Heliothis armigera
- Corcyra
- Callosobruchus sps

Study of prepared slides

- Whole mount of insects
- Legs
- Mouth Parts
- Wings
- Histology of insect
- Antennae

Study of selected insects

- Study of selected insects as museum specimens.
- Identification of selected insect and their identification with the help of taxonomic key

Microtomy

Field trips for insect's collection and preservation (eggs, larva, pupae & adult)

Spotting

- Insect specimen with Morphological adaptation
- Whole mount insects slide
- Histology slide
- Specialized body parts

Cell & molecular biology

Operation of microscope:

- Experiments on phase contrast
 - Use of fluorescence microscope: Detection of nucleic acid by acridine orange/ ethidium bromide.
1. Techniques:
 - Separation of protein by Agarose gel electrophoresis
 - Separation of DNA by Agarose gel electrophoresis
 - Separation of proteins and isoenzymes on SDS-PAGE and PAGE.
 - Commet assay
 - DNA Ladder assay
 - Westurn blotting
 - Experiment on PCR
 2. Chromosomal Techniques:

- Preparation of salivary gland chromosome from *Drosophila*/Chironomous larva and stain with acetocarmine/acteo-orcein/fulgen
 - Preparation of mammalian chromosome from bone marrow or testis and stain with Giemsa stain
3. Preparation of biological tissues and sectioning
- Paraffin wax histology by microtome
 - Fresh- frozen by cryostate

SEMESTER IV

MZO-401 [Applied Zoology & Biostatistics]

Duration: 3 hrs.

Max.

Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

- Economic importance of Protozoa: Beneficial and Harmful protozoa
- Economic importance of Helminthes: Beneficial and harmful Helminthes
- Economic importance of Arthropods: Beneficial and Harmful mites and ticks, crustaceous, spiders, insects.
- Insects a pollinators, ornamental insects, as food.
- Lac insect, Honey bees, Silk worm and industries related to them.
- Harmful insects:- insect pest: crop pest, storage pests, pests of fruit and vegetables, pest of medical and veterinary importance and their management.

UNIT II

- Pisciculture and products of fishing industry
- Prawn fisheries.
- Economic importance of mollusca: Pearl culture.
- Poultry keeping and Duck poultry.
- Dairy farming and Piggery.
- Leather industry, wool industry, (Fur and Fur Industry).

UNIT III

Introduction to Biostatistics

- Definitions of biostatistics
- Statistical symbols

- Scope & Applications of biostatistics
- Collection, organization and representation of data

Measures of Variability

Mean deviation

Standard deviation

Variance and coefficient of variation

Correlation and Regression

- Types of correlation
- Methods of studying correlation
- Regression analysis
- Uses of regression analysis

UNIT IV

Tests of Significance

- Significance of difference in means
- Standard error of mean
- Student's t-test
- F-test

Chi-square test

- Testing goodness of Fit
- Chi-square distribution and characteristics
- Applications of Chi-square test
- Yate's correction

Analysis of Variance

- One-way classification
- Two-way classification

MZO-402[Tools & Techniques in Biology]

**Duration: 3 hrs.
70**

Max. Marks:

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Principle and application of :-

- Light microscopy and micrometry
- Phase contrast microscopy
- Interference microscopy
- Polarized microscopy
- Fluorescence microscopy
- Transmission electron microscopy
- Scanning electron microscopy
- Confocal scanning microscopy

UNIT II:

Principle and application of :-

- Ultracentrifugation :Differential and density gradient
- Electrophoresis: Agarose,PAGE, isoelectro-focussing points and capillary electrophoresis
- Chromatography:Paper,TLC,GLC,HPLC,ion-exchange and affinity chromatography
- Freeze techniques:Freeze –drying,Freeze substitution,Freeze fracture and freeze itch
- X-ray diffraction
- Lamberts – Beer’s Law and Colorimetry,
- Spectrophotometry:fluorescence,UV,NMR,, ESR.
- Flow cytometry/fluorescence activated cell sorter

UNIT III:

Principle and application of radiation techniques in biology

- Radioisotopes and half life of isotopes
- Tracer techniques in biology
- Auotoradiography
- Geiger Muller counter
- Scintillation Counter

UNIT IV

Principles and technique of :-

- Nucleic acid hybridization and cot curves

- Sequencing of nucleic acids
- Blotting techniques(southern, northern and western)
- Polymerase chain reaction
- Screening of genomic and complementary DNA libraries
- Hybridoma technology
- Embryo sexing
- Assisted reproductive technologies
- Cell culture techniques:-culture media, primary and secondary culture,cell line,transformation,techniques (in brief)Cell proliferation measurements, Cell viability test

SUGGESTED READING:

1. Cell and Molecular Biology, (3rd edition), P Sheeler and D E Bianchi, John Wiley & Sons, Inc, 1987

5. Fundamental Laboratory Approaches for Biochemistry and Biotechnology, A J Ninfa., D P Ballou, Fitzgerald science press, Inc., 1998
6. Principles and Practice of Bioanalysis, R F Venn, Taylor and Francis, 2003
7. Principles and Techniques of Biochemistry and Molecular Biology ,(6th edition), K Wilson and J Walker (editor), Cambridge University Press, 2007
8. Bioinstrumentation, J G Webster, John Wiley & Sons Inc. 2004
9. Methods in Modern Biophysics, B Notting, Springer Verlag Berlin Heidelberg New York, 2003
10. Protein Purification Principles and Practice, (3rd edition), R K Scopes, Spring International, 2004
11. Spectroscopy for the Biological Sciences, G G Hames, John Wiley & Sons Inc. 2005

PRACTICALS

Paper I [Applied Zoology & Biostatistics]

Applied Zoology

- General introduction to stains, preservations and fixatives.
- Museum specimens
 - Protozoa- Selected species of economic importance
 - Plathelminthes- Selected species of economic impotence
 - Arthropoda- Mites, Ticks, Spiders, Insects
- Permanent preparations- Whole mounts, various body parts/Appendages
- Visit to fish industry/Poultry farm/ Dairy/ Leather industry etc.

Biostatistics

Preparation of frequency tables, histograms, frequency curves, ogives and pie diagrams.

- Calculation of standard deviation and coefficient of variation.

- Estimation of significance between samples using Student's t-test, F-test and Chi-square test.
- Plotting of regression lines, calculation of correlation and regression analysis .
- Analysis of variance (One-way & Two –way classification).

Paper II[Tools & Techniques in Biology]

4. Demonstration of different types of Microscopes
5. Demonstration of different types of Spectrophotometers
6. Demonstration of Chromatographic equipment
7. Demonstration of Electrophoresis equipment.
8. Visit to tissue culture lab
9. Some exercises based on the syllabi may be devised according to the availability of equipments.

Core Elective III

MZO-403 A [Applied Aspects of Toxicology]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Food Toxicology

- Nature and complexity of food
- Safety standards for food, food ingredients and contaminants
- (Food, drug & cosmetics Act, food and colour additives, GRAS (generally recognized as safe)
- Tolerance setting for substances in food (Pesticide residues, drugs used in food producing animals, unavoidable contaminants (heavy metals, chlorinated organics, Nitrosamine, food-borne molds & mycotoxins)
- Microbiologic Agents Substances produced by cooking

Unit II

Forensic / Analytic Toxicology

- Analytical role in general toxicology
- Analytical role in Forensic Toxicology
- Toxicological investigation of a poison death
- Criminal poisoning of the living

UNIT III

Occupational Toxicology

- Workplace, exposures, and standards (Nature of the work force, Determinants of dose occupational exposure limits)
- Occupational diseases (Silicosis, Asbestosis, Psittacosis, Fluorosis & Others)
- Toxicological Evaluation of Occupational agents

UNIT IV

Regulatory Toxicology

- Programs for regulating chemical hazards (Food & Drug Administration, EPA, Occupational Safety and Health Administrations)
- Regulatory Control over Toxicity
- Animal Welfare Requirement
- Wild Life Toxicology

Risk Assessment

- Hazard Identifications (Assessing Toxicity of Chemicals)
- Risk Characterization
- Risk Perception & comparative Analysis of Risk
- Environmental Impact Assessment

11. Study Material (Handbooks) of Sikkim Manipal University for Science Health and Technology for the Degree of Post Graduation in Ecology and Environment
12. Sharma, B.K. Environmental Chemistry. Meerut publication
13. Pandey, Shukla, Trivedi, Fundamentals of Toxicology. New Central book agency

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Conceptual framework

- The ICRP (International Commission on Radiological Protection) Basic Framework (types of exposure, control of radiation sources); brief review of quantities, including collective dose
- The System of Radiological Protection in proposed and continuing practices:
- Justification of a practice; optimization of protection with examples; individual dose limits
- Potential exposures; dose and risk constraints
- System of protection for intervention
- Assessment of the effectiveness of the system of protection

UNIT II

The role of international organizations in radiation protection

- International Atomic Energy Agency (IAEA): Statutory functions; establishment and implementation of safety standards, legally binding instruments: Conventions
- International Commission on Radiological Protection (ICRP)
- International Commission on Radiation Units and Measurements (ICRU)
- United Nations Scientific Committee on the Effects of Atomic Radiation (UNSCEAR)
- International Labour Organisation (ILO)
- World Health Organization (WHO)
- Food and Agriculture Organization of the United Nations (FAO)
- OECD Nuclear Energy Agency (OECD/NEA)
- Pan American Health Organization (PAHO)

UNIT III

The development of safety culture

- Safety culture of staff at all levels
- Priority to safety : policies, procedures; responsibilities; the lines of authority for making decisions; organizational arrangements; communication lines
- Safety culture indicators
- Examples of safety culture

UNIT III

- Legislation - Radiation Safety Act 1975 –
- Radiation Safety (General) Regulations 1983
- Hazardous Waste Management and Handling Rules / Biomedical Rules / Solid Waste Management Rules
- Atomic Energy Act (AEA) 1962 and rules

SUGGESTED READING:

- Granien, R., Applied Radiobiology of Radiation Protection. Prentice Hall, 1990.

MZO403 C [Industrial, Medical & Veterinary Entomology]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Industrial Entomology

Types and life history of honey bees used in Apiculture.

- Bee keeping Management & prospects.

Life history and cropping of lac insect.

- Lac – Utility and scope of lac industry.

Types of silk worm, life history and rearing of silk worms.

- Silk worm pathology & insect Pest management
- Mulberry and Non mulberry Silk production.

UNIT-II

Medical Entomology

- Study of following insects as vectors of human diseases regarding their classification up to family, appearance, habit, brief life history, distribution, diseases caused and control measures :- Mosquito(Anopheles & aedes) , flea, housefly.

UNIT-III

Forensic Entomology

- Forensic entomology with special reference to man and wild life.
- Beneficial insects (silk worm, honey bee, lac insect and industries related to them).

UNIT-IV

Veterinary Entomology

- Study of following insects as pests of domestic animals with general reference of their classification up to family, habit, brief life history, damage, diseases caused and control measures :- Horse fly, cattle blood sucking fly, Flesh fly, Poultry louse .

SUGGESTED READING:

1. A text book of Applied Entomology, vol.2 - K. P. Srivastava, 1996.
2. Elements of Entomology- Rajendra singh.
3. A text book of Forest Entomology – T.V. Sathe, 2009.
4. Sericulture and Pest Management – T.V. Sathe and A.D. Jadhav, 2001.
5. Sericultural crop protection – T.V Sathe, 1998.
6. Agricultural Pests of India and South East Asia – A.S. Atwal, 1993.
7. Crickets and Household pests – T.V. Sathe and M.R. Awate, 2009.
8. Beekeeping in the tropics – G.S. Smit, 1960.

9. Beekeeping in India, ICAR, New Delhi, S. Singh, 1975.
10. A handbook of practical Sericulture, CSB, Ullal and Narsimhanna, 1981.
11. Lac culture in India farm information unit, DEMOFA, New Delhi, S. Krishnaswami,
12. A text book of applied entomology- K. P. Srivastava.
13. Elements of entomology- Rajendra singh

MZO 403D [Cellular mechanics]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Cell Death and Cell Renewal

- Programmed Cell Death
- The Events of Apoptosis
- Caspases: The Executioners of Apoptosis
- Central Regulators of Apoptosis: The & I-2 Family
- Signaling Pathways that Regulate Apoptosis

UNIT II

Cancer

- Types of Cancer
- The Development of Cancer
- Causes of Cancer
- Properties of Cancer Cells
- Transformation of Cells in Culture

Oncogenes

- Retroviral Oncogenes
- Proto-Oncogenes
- Oncogenes in Human Cancer
- Tumor Suppressor Genes

UNIT III

Aging: The biology of senescence

- Maximum life span and life expectancy
- Causes of aging
 - (a) General wear and tear and genetic instability
 - (b) Free radicals, oxidative damage and antioxidants
 - (c) Telomerase and aging

UNIT IV

Stem Cells and the Maintenance of Adult Tissues

- Proliferation of Differentiated Cells
- Stem Cells
- Medical Applications of Adult Stem Cells
- Cells

Embryonic Stem Cells and Therapeutic Cloning

- Embryonic Stem Cells
- Somatic Cell Nuclear Transfer

ESSENTIAL READINGS:

1. Cell and Molecular Biology; De Robertis and De Robertis; Saunders College
2. Cell Biology; Powar, C.B.; Himalaya Publications.
3. Molecular Biology of the gene; Watson J.D; Benzamin/ Cummings
4. Molecular Biology of the Gene. I.D Watson, N.H. Hopkins, J.W. Roberts, J.A. Steiz and AM Weiner The Benjamin/Cummings Pub. Co., Inc., California.
5. Molecular Cell Biology, J. Darnell H.Lodish and D. Baltimore Scientific American Books, Inc., USA.
6. Molecular Biology of the cell. B.Alberts, D.D.Bray, J.Lewis, M.Rafif, K. Roberts and J.D.Watson. Garland Publishing inc., New York.
7. Gene IV, Benjamin Lewin. Oxford University Press, UK.
8. Molecular Biology and Biotechnology. A comprehensive desk reference, R.A.Meyers (Ed.), VCH Publishers, Inc., New York.
9. Molecular Cloning: A Laboratory Manual, J.Sambrook, E.F.Fristsch and T. Maniatis, Cold Spring Harbor Laboratory Press, New York.
10. Introduction to Practical Molecular Biology, P.D.Dabre, John Wiley& Sons Ltd. New York.
11. Molecular Biology Lab Fax, T.A.Brown (Ed.), Bios Scientific Publishers Ltd., Oxford.

Core Elective IV

MZO-404[Biomonitoring & Bioremediation]

Duration: 3 hrs.

Max. Marks:

70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I

Biofertilizers and Biopesticides & Bioindicators

- Biofertilizers in Agrosystem
- Biopesticides
- Bioindicators
- Microbial and Antimicrobial pesticides
- Integrated Pest Management

Composting :

- Type substrate and process
- Decomposing stages and methods
- Vermi composting and its application

UNIT II

Bio accumulation, Bio magnification

Degradation of xenobiotic compounds

- Aliphatic compound
- Aromatic : benzene, toluene, naphthalene
- Pesticide : DDT, propanil, 2,4,D

Role of micro organism in Bio degradation

Genetic engineered micro organism in Bio degradation.

UNIT – III

Biomonitoring

Objectives of Biomonitoring

Bioindicators and Environmental monitoring

Bioassay and its applications in Toxicology

- Toxicology of Pesticides – (Types; Effects on Human Health).
- Toxicology of Heavy Metals - Arsenic, Cadmium, Lead and Mercury- (Sources and Emissions and Harmful effects on Human Health)
- Toxicology of Radioactive Substances – (Types and Biological Effects on animals – Somatic and Genetic effects).

UNIT IV

Bioremediation

- Microorganisms in Bioremediation and their role in bioremediation
- Bioremediation Processes and Technologies
- Monitoring the efficacy of bioremediation
- Bioremediation of Marine Oil pollutants and air pollutants

13. Pandey, Shukla, Trivedi, Fundamentals of Toxicology. New Central book agency

MZO 404 B [Occupational Exposure and Radiation Safety]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Radiation protection programme

Prior radiological evaluation and safety assessment; scope and structure of the radiation protection programme; responsibility and commitment of registrant, licensees and employers; responsibility of workers and others at the workplace; radiation protection organization; special administrative arrangements; infrastructure; role of the radiation protection officer; role of the qualified expert; lines of communication (internal, between employers, with regulatory authority); safety culture; quality assurance; emergency preparedness

UNIT II

Industrial radiography

Overview of industrial radiography; types of exposure devices (gamma radiography sources and containers; X ray radiography equipment; pipe crawler equipment; real time radiography); radiation protection programme: protection of workers; protection of the public; emergency preparedness and response; lessons learned from accidental exposure in industrial radiography

Mining and processing of raw materials

Basic requirements for safety; ventilation; exclusion and exemption; radiation protection programme; protection of the workers

UNIT III

Nucleonic gauges

Overview of gauging devices; organizational responsibilities; basic requirements for safety; safety associated to the equipment; radiation protection programme; protection of the workers

Radioisotope production plants

Overview of radioisotope production plants; organizational responsibilities; basic requirements for safety. Safety associated to the plant; specific regulatory requirements; radiation protection programme. Control of effluents; protection of workers

UNIT IV

Diagnostic radiology & radiotherapy

- Overview of diagnostic radiology; classification of the equipment: general and specialized radiology, basic requirements for safety; safety associated to the equipment (IEC standards); shielding; radiation protection programme; protection of the workers
- Overview of radiotherapy. Radiation sources and equipment used in brachytherapy and teletherapy, basic requirements for safety; safety requirements on radiation sources and equipment (IEC and ISO) for radiotherapy; radiation protection programme, protection of the workers
- Nuclear medicine: diagnostic applications (in vivo and in vitro)

MZO-404 C [Insect Toxicology and Pest Control]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT-I

Definition and history of various methods of insect pest control

- Physical
- Mechanical
- Chemical
- Cultural
- Quarantine regulations.

UNIT-II

Nomenclature and classification of insecticides. Concept of

- Ist , IInd and IIIrd generation pesticides
- Pesticides act of India.
- Selection of insecticides, their formulation and mode of action.
- Preventive measures and antidotes.
- Fumigants and appliances used for application of insecticides.
- Mechanism of insecticides resistance in insects. Insecticide synergists and antagonist.

UNIT-III

Biological control :

- Definition, biological control agents

Parasites :

- Parasitoids
- Predators
- Microbial pesticides
- Mass production and distribution
- Advantages and disadvantages of biological control.

UNIT-IV

Integrated pest management (IPM)

- Definition, importance,
- Tools, basic principles
- Evolutionary trends.

Dynamics of environmental pollution.

Pesticides:

- Their impact on wild life
- Their impact on human health (bio accumulation, bio magnification, biodegradation)

SUGGESTED READING:

MZO 404D [Molecular Immunology]

Duration: 3 hrs

Max. Marks: 70

Note: There will be two parts in end semester theory paper.

Part A of the paper shall contain 7 short answer questions of 7 marks. Each question will carry one mark for correct answer.

Part B of the paper will consist of four questions, one question from each unit with internal choice. Each question will carry 7 marks.

UNIT I:

Molecular Immunology.

- Discovery of humoral and cellular immunity.
- Innate (nonspecific) immunity.
- Adaptive (specific) Immunity.

Cells and organs of immune system.

- Hematopoiesis.
- B-lymphocytes, T-lymphocytes, Null cells.
- Mononuclear cells
- Granulocytic cells
- Mast Cells.
- Dendritic cells.

Organs of immune system.

- Primary lymphoid organs
- Lymphatic system.
- Secondary lymphoid organs

UNIT II

Antigens.

- Immunogenicity versus antigenicity.
- Factors that influence immunogenicity
- Contribution of the immunogens (foreignness, molecular size, chemical composition and heterogeneity, susceptibility to antigen processing and presentation).
- Contribution of Biological system. (Genotype of the recipient animal, immunogen dosage and route of administration, adjuvants).
- Epitopes
- Haptans.

Immunoglobulins : structure and function.

- Molecular structure of Ig, Light chain and Heavy chain
- Immunoglobulin domains.
- Immunoglobulin classes
- Immunoglobulin-mediated effector functions (Opsonization, activation of complement, antibody dependent cell mediated cytotoxicity).
- Antigenic determinants on immunoglobulin (isotype, allotype and idio type).
- Monoclonal antibodies.

UNIT III:

Antigen-Antibody

Interaction.

Major Histocompatibility complex.

- General organization and inheritance of MHC.
- MHC molecules and genes.
- Genomic maps of MHC genes.
- Cellular distribution of MHC molecules.
- Regulation of MHC expression.
- MHC and immune responsiveness.
- MHC and disease susceptibility.

UNIT IV:

Antigen Processing and Presentation.

- Role of antigen presenting cell.
- Evidence for two processing and presentation pathways.
 - Endogenous antigens: The cytosolic pathways.
 - Exogenous antigens: The endocytic pathway.
- Presentation of nonpeptide bacterial antigens.

Cytokines.

- Properties of cytokines.
- General structure of cytokines.
- Functions of cytokines.
- Cytokine related diseases.

Immune system in Health and Disease.

- Immune response to infectious disease.
 1. Viral infections.
 2. Bacterial infections.
 3. Protozoa and diseases.
 4. Diseases caused by helminthes.

Practicals

Toxicology

- Estimation of Non-Respirable Dust in Air by using Dust Sampler
- Estimation of Respirable Dust in Air by using Dust Sampler
- Microbial analysis in Water
- Analysis of Adulteration in food samples
- Bacteriological analysis of drinking water by MPN method
- IMVIC Test
- Microbial analysis in soil
- Practical Training& dissertation
- Visit to In situ or Ex situ Conservation Centre/ Social Service Organization/ Environmental Education Centre
- Visit to Local Polluted Site -Observations and Remedial Measures

PRACTICALS

- Personnel monitoring: use of survey meter, film badge, and room contamination monitor
- Decontamination of contaminated material.
- Radioresponse of tumors

- Chemoprevention of chemical carcinogenesis
- Morphological, histopathological, and biochemical studies of various cancerous tissues.
- Study of Pre-cancerous and cancerous lesions of oral cancer , Breast cancer, Cervix cancer, prostate cancer etc.
- Visits to the Radiotherapy Department, S.M.S. Medical College, Jaipur: Rajasthan Atomic Power Project. Kota and Bhabha Atomic Research Centre, Mumbai.
- Class Record.
- Viva

PRACTICALS: IV SEMESTER

Anatomy

- Honey bee- Nervous system
- House fly-Nervous system
- Gryllus-Nervous system, Alimentary canal

Permanent Preparation

- Stinging apparatus, pollen basket, mouth parts, antennae, leg and wings of honey Bee.
- Sponging mouth parts, antennae, legs and wings of house fly
- Whole mounts thrips' and aphids

Testing of insecticide – Bioassay method (LC₅₀ and LD₅₀ of any one synthetic and one natural insecticide in stored grain pests)

Study of prepared slides

- Whole mount of insects
- Legs
- Mouth Parts
- Wings
- Histology of insect
- Antennae

Appliances for application of insecticides

- Knap sack sprayer
- Knap sack duster
- Hand sprayer

Study of selected insects

- Study of selected insects as museum specimens.
- Identification of selected insect and their identification with the help of taxonomic key

Microtomy

Exercise in Physiology

- Analysis of honey and its quality control
- Analysis of chitin presence in the insect integument

- Study of pH of the gut in larvae of insects
- Application of Dyar,s law
- Study of giant chromosome.

PRACTICALS

SEM IV

10. Microtomy:

- Use of oculometer-standerization and measurement of cell height, nuclear diameter and tubular diameter
- Use of grid-standerization and counting of cells or nuclei in cross section of epithelium.

11. Cytochemistry/Histochemistry:

- Carbohydrate (a) PAS method (b) Alcian blue method
- Protein (a) Lorry's method (b) Ninhydrin method
- Nucleic acid (a) Feulgen method (b) Methyl green –Pyronin method
- Detection of enzymes (a) Alkaline phasphatase (b) Acid Phasphatase

12. Permanent slides:

- Histopathological changes in organs
- Mitosis
- Meiosis

13. Smear preparation from cauda epididymus
